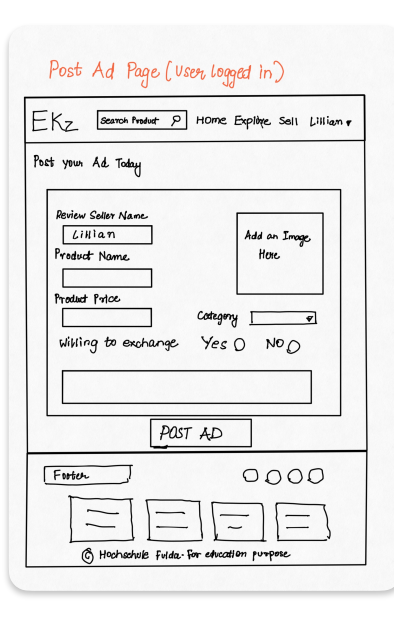
Screen 3: Explore Page

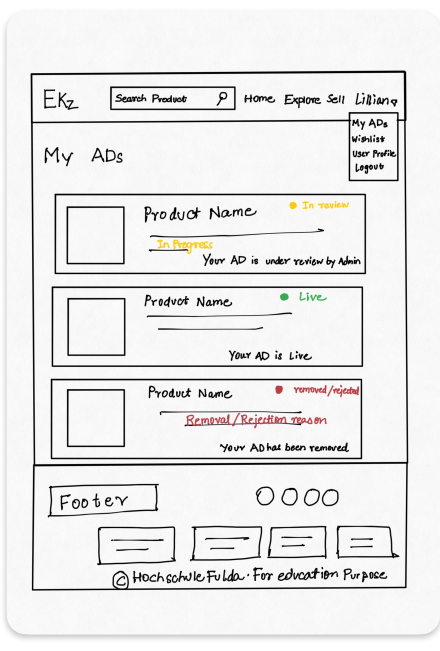
- **Scene**: After successfully logging in, Lillian finds herself on the Explore page.
- **Action**: She clicks on the **"Sell"** button (in the navigation bar) to add a new post.



Screen 4: Add New Post Page

- **Scene**: A pop-up window appears to add a book listing.
- **Action**:

- Lillian grabs an image of her book and adds it to the form.
- She fills in the details like the book's name, edition, author, year, and a short description.
- She double-checks everything to make sure it's all correct.
- Now she has an option to either sell the book or exchange the book with the buyer's offering by selecting yes or no option.
- Finally, she clicks the **"Post Ad"** button.

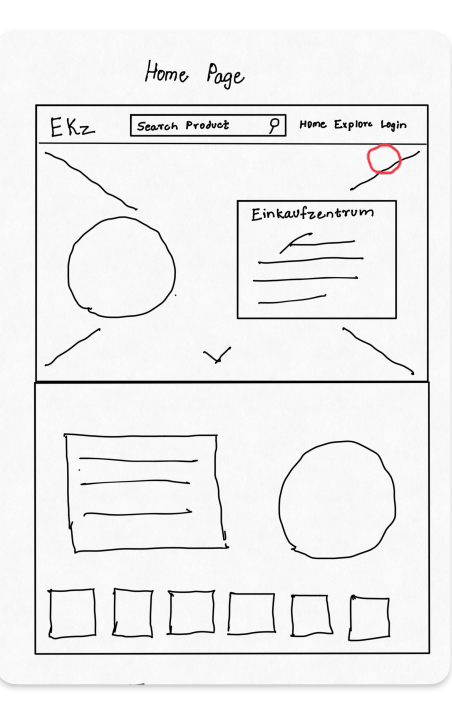


Screen 5: My ADs Page (Post Submission Confirmation)

- **Scene**: Lillian gets redirected back to My ADs page.
- **Action**: She checks the status of her AD and gets updated about the action taken by the administrator on her AD (In review, Live, Rejected/Removed)

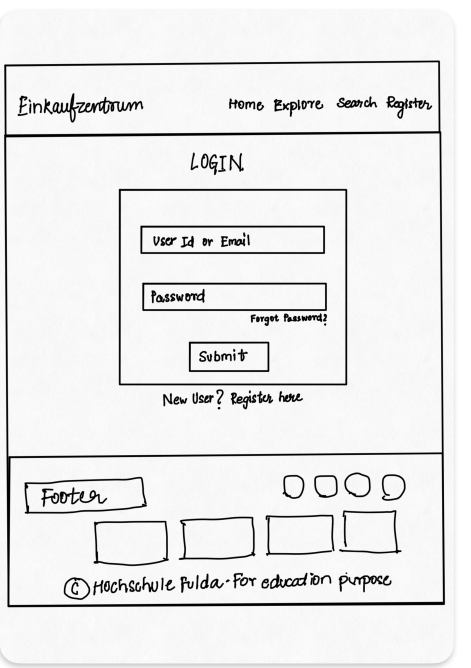
Use case 2

Student wants to buy a laptop



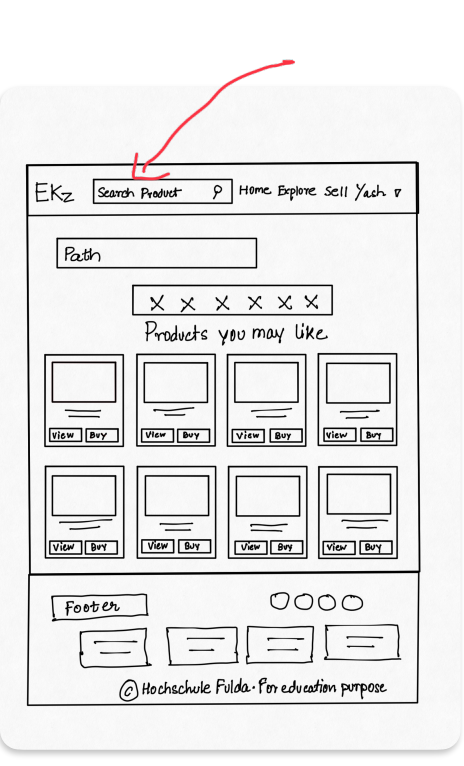
Screen 1: Homepage

- **Scene**: Yash opens the Einkaufzentrum website.
- **Action**: He clicks on the **"Login"** button.



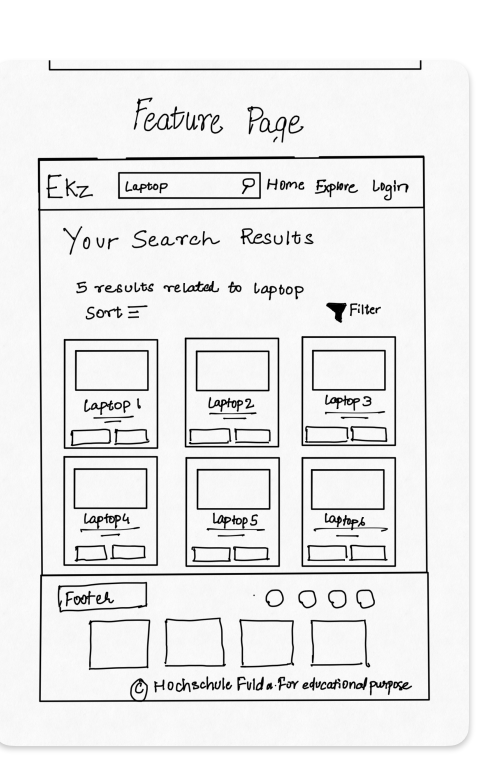
Screen 2: Login Page

- **Scene**: The login form pops up.
- **Action**: Yash types in his username and password and logs in.



Screen 3: Explore Page

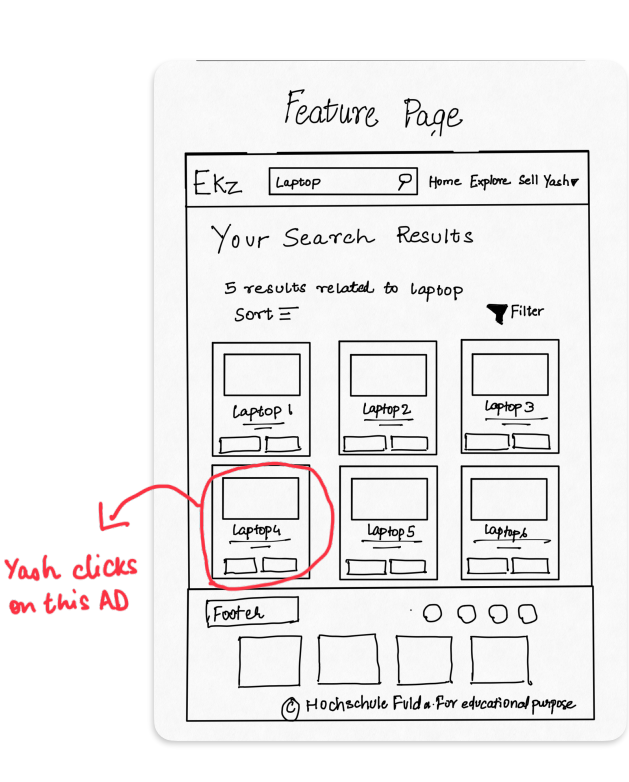
- **Scene**: After successfully logging in, Yash is greeted with the Explore page.
- **Action**: He clicks on the **"Search"** button to start looking for specific products.



Screen 4: Search Page

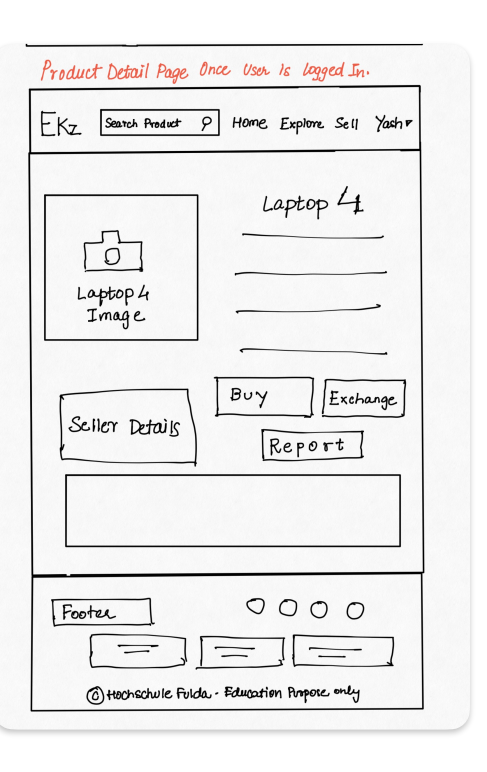
- **Scene**: The search bar is now active

- Yash types in a laptop with specific requirements as per his choice..
- He presses **Enter** to initiate the search.



Screen 5: Search Results Page

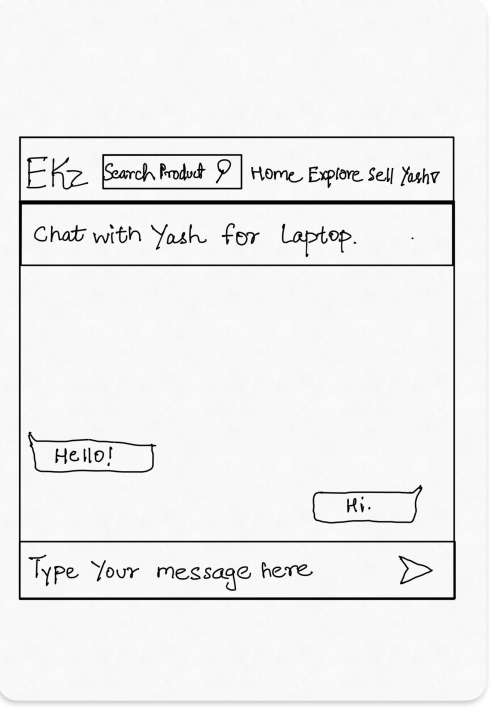
- **Scene**: The system shows a list of laptop ads that match his search.
- **Action**: Yash looks through the listings and finds one that matches his expectations



Screen 6: Product Details Page

- **Scene**: Yash clicks on the post he's interested in to see all the details. After checking it out, he decides to buy it.
- **Action**:

- He reviews all the seller-provided details, including images, pricing, condition, and description.



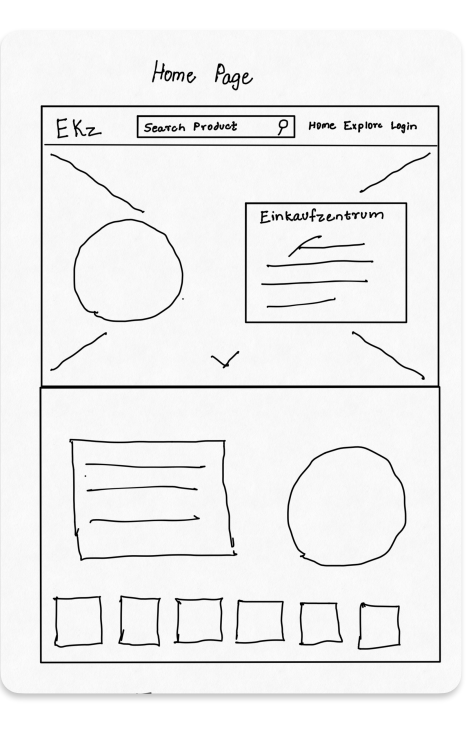
Screen 9: Messaging Initiation

- **Scene**: After deciding to go ahead with the purchase, Yash clicks the **"Buy"** button.
- **Action**:

- He's taken to the built-in **messaging page**, where he can **chat** directly **with the seller** to discuss the details and finalise the deal.

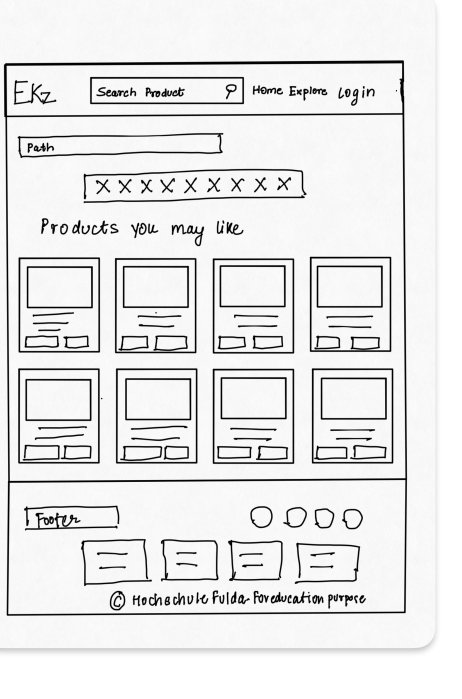
Use case 3

Guest Views Public Listings



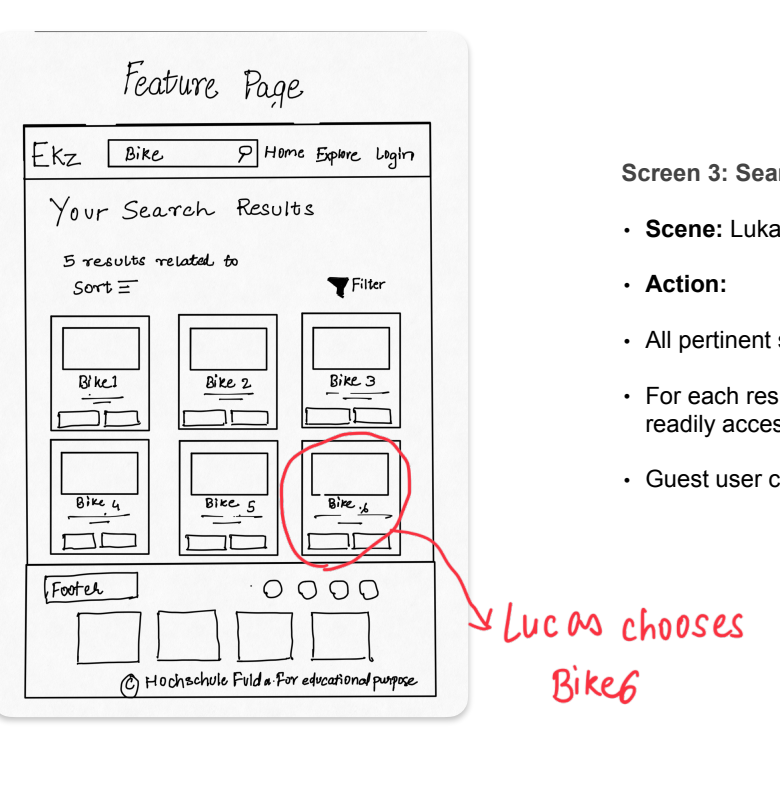
Screen 1: Homepage

- **Scene**: Lukas opens the Einkaufzentrum website and lands on the homepage.
- **Action**: He clicks on the **"Explore"** button to start browsing listings as a guest.



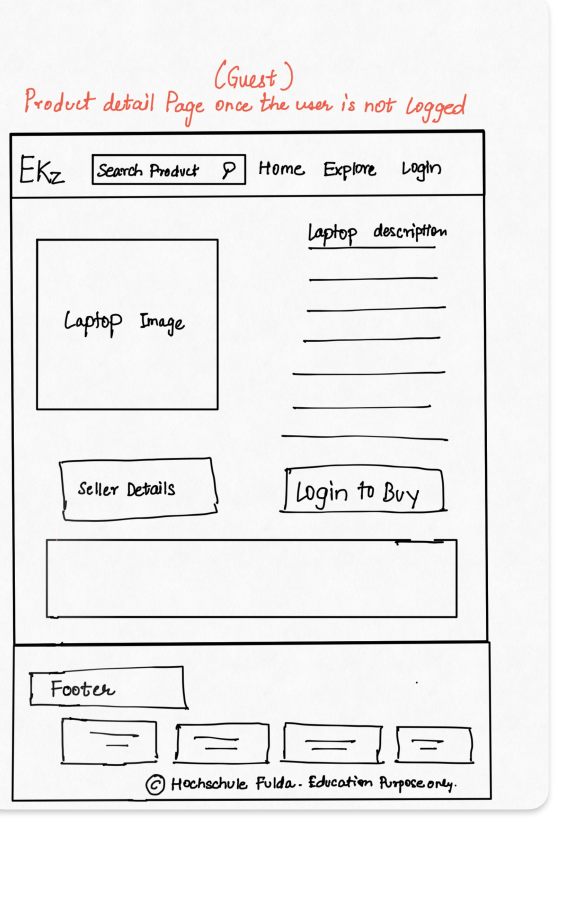
Screen 2: Explore Page

- **Scene**: The Explore page pops up with a bunch of listings.
- **Action**: Lukas takes a look and finds some Bikes. He's thinking about making a more specific search.
- Lukas clicks on the **"Search"** area and types in bike and hit enter.



Screen 3: Search Results Page (Initial)

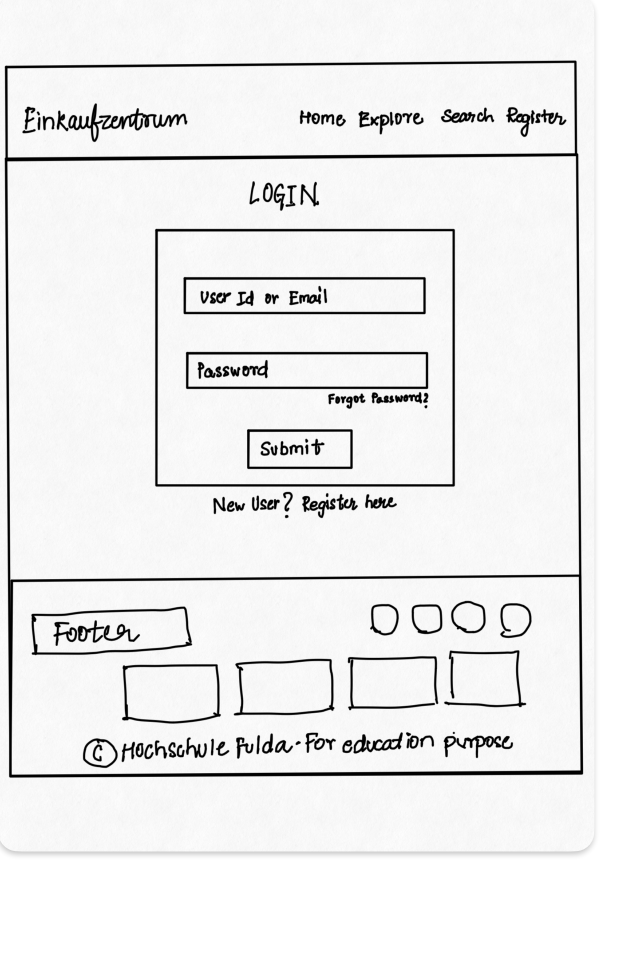
- **Scene:** Lukas is directed to the **Search Results** page.
- **Action:**
- All pertinent search results for his specified query are presented.
- For each result, a concise overview of the associated product details is readily accessible
- Guest user clicks on 6th bike which he liked.



Screen 5: Product Detail Page

- **Scene:** Lukas clicks on one of the listings he admires.
- **Action:**
- The **Product Detail** page opens, displaying all the relevant information, including:

- Product name
- Description
- Images
- Price
- Seller details (partially hidden or blurred due to guest access)

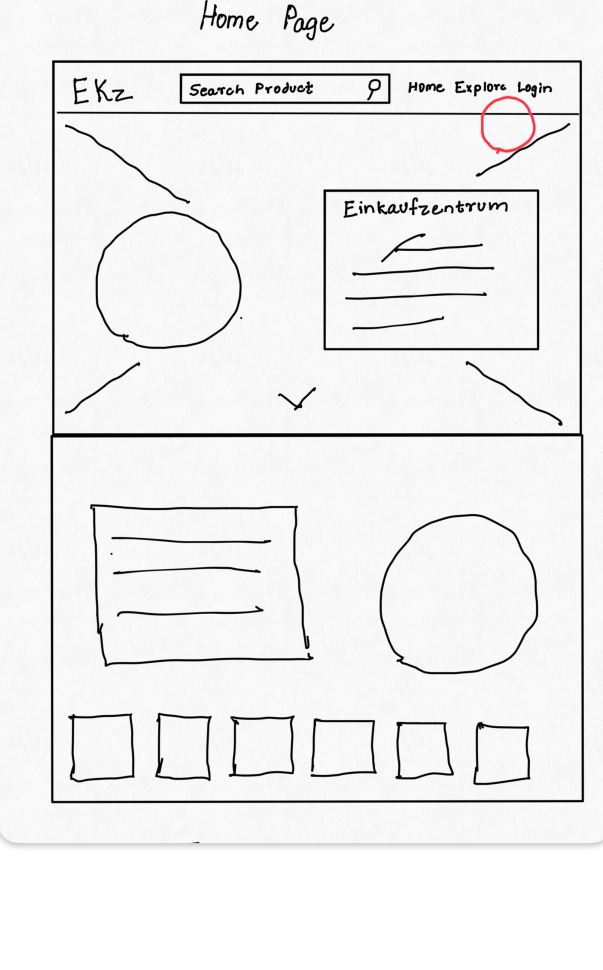


Screen 6: Login Prompt

- **Scene**: Lukas wants to chat with the seller and get the bike.
- **Action**: Since Lukas is a **guest**, he needs to **log in or sign up** to start the transaction or send a message to the seller.

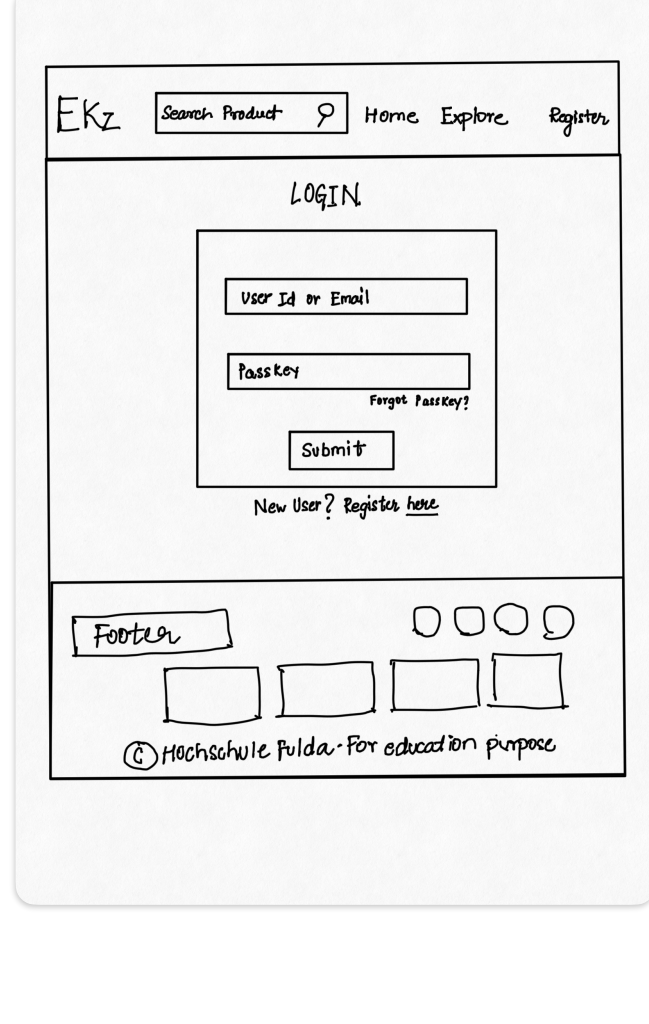
Use case 4

Admin Monitors Dashboard and Reports



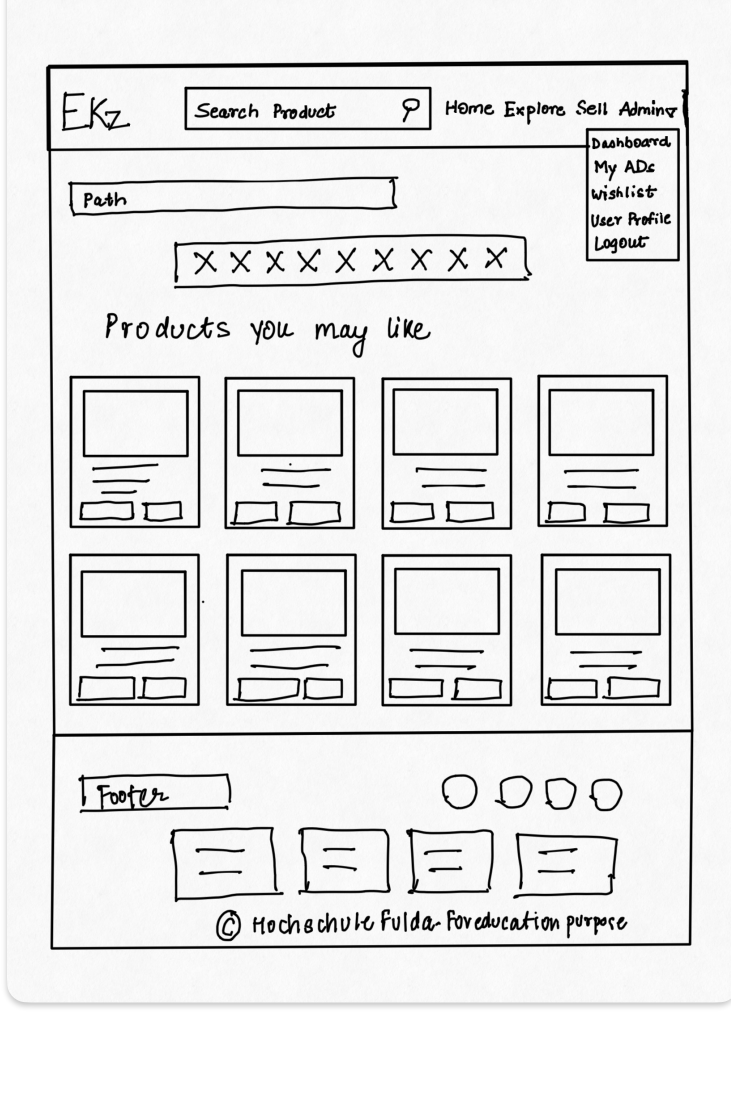
Screen 1: Homepage

- **Scene**: The admin opens the Einkaufzentrum website and lands on the homepage, just like any other user.
- **Action**: He clicks on the **"Login"** button.



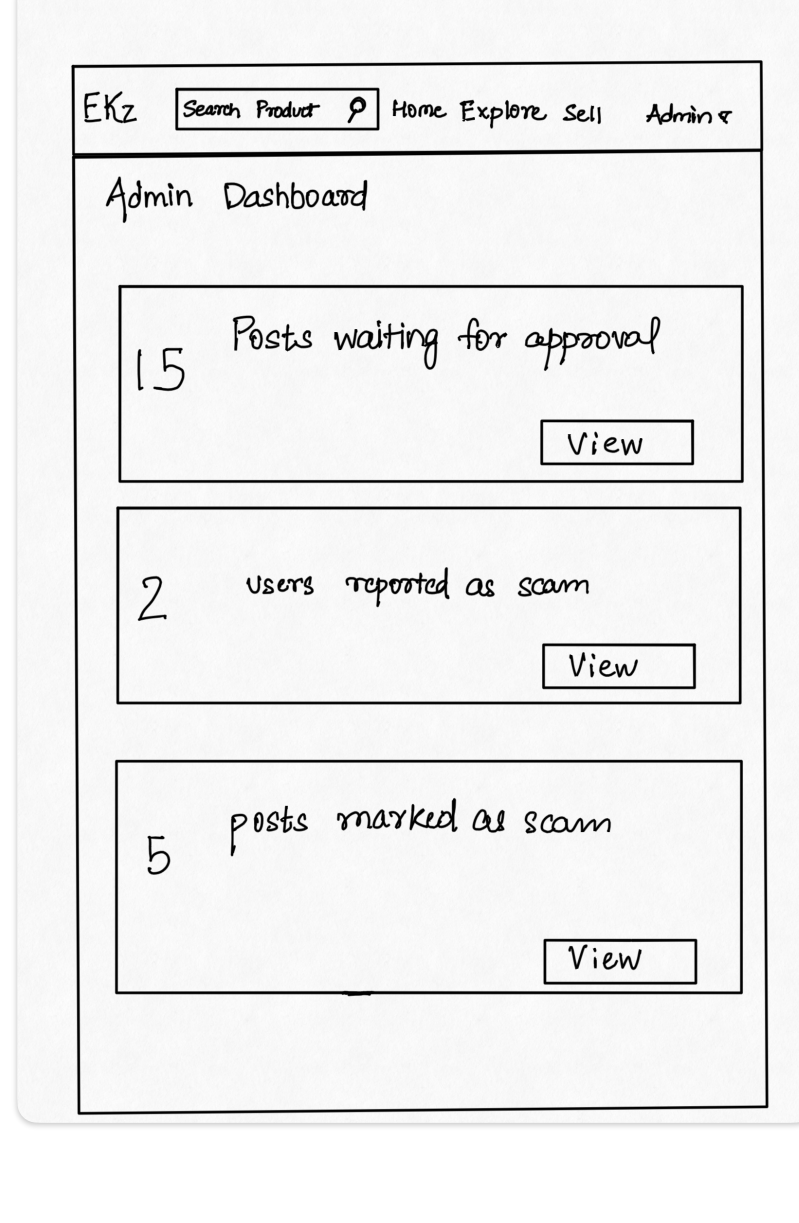
Screen 2: Login Page

- **Scene**: The login form pops up.
- **Action**: The admin types in his **admin credentials** and logs in.



Screen 3: Explore Page

- **Scene**: After logging in successfully, the admin is greeted with the Explore page.
- **Action**: When clicked on admin keyword in navbar a dropdown appears with **"Dashboard"** option.

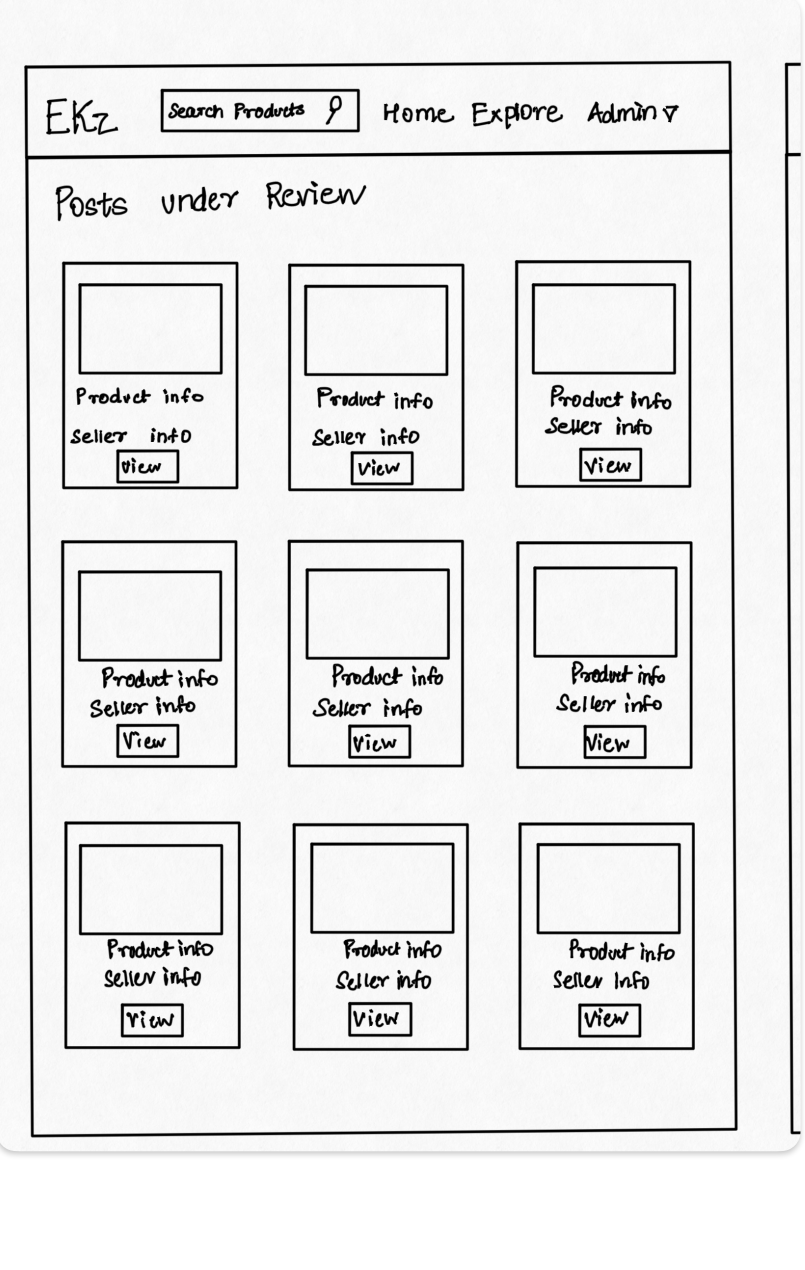


Screen 4: Admin Dashboard

- **Scene:** The **Admin Dashboard** page loads.
- **Action:** The dashboard displays three primary sections (cards or tabs):

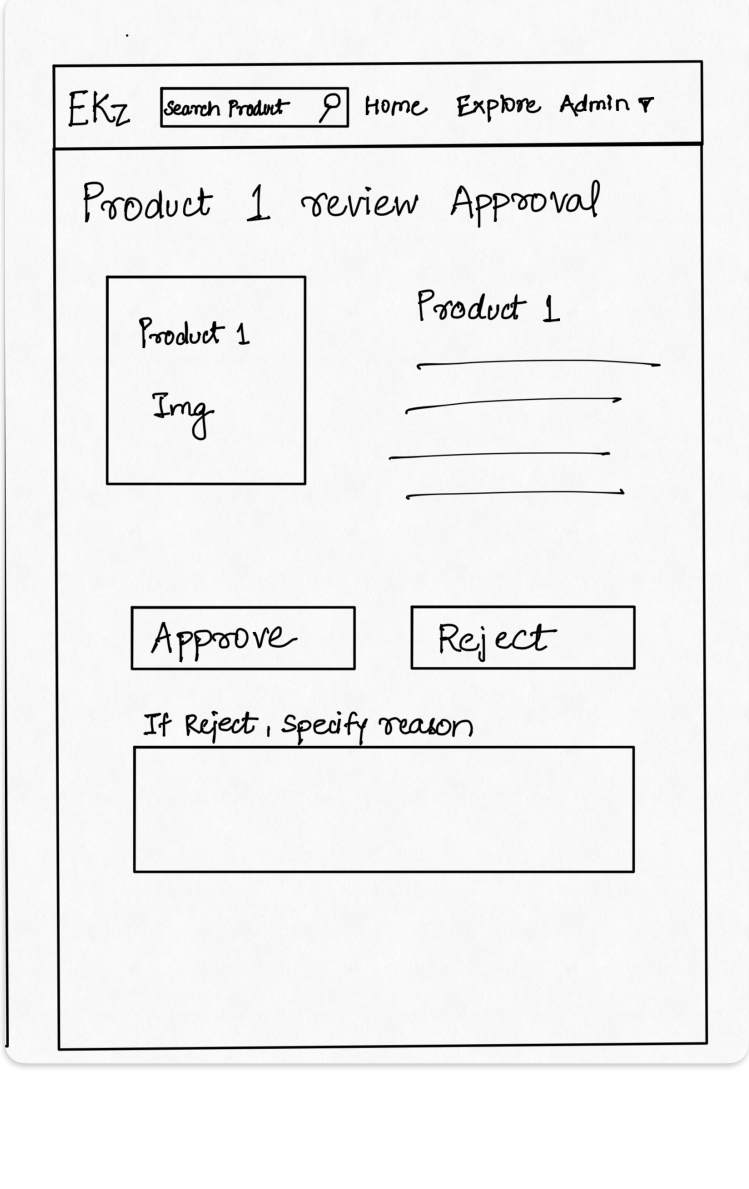
* **Posts awaiting approval**
* **Users reported as scams**
* **Posts marked as scam/spam**

Each section contains a **"View All" button** or a similar action to manage and inspect items in detail.



Screen 5: Posts Pending Approval

- **Scene:** An administrator navigates to **Section 1**, *which displays posts awaiting approval.*
- **Action:**
- A new screen emerges, presenting a comprehensive list of **posts** submitted by sellers. Each post is meticulously detailed, accompanied by a **"View"** button for easy access.



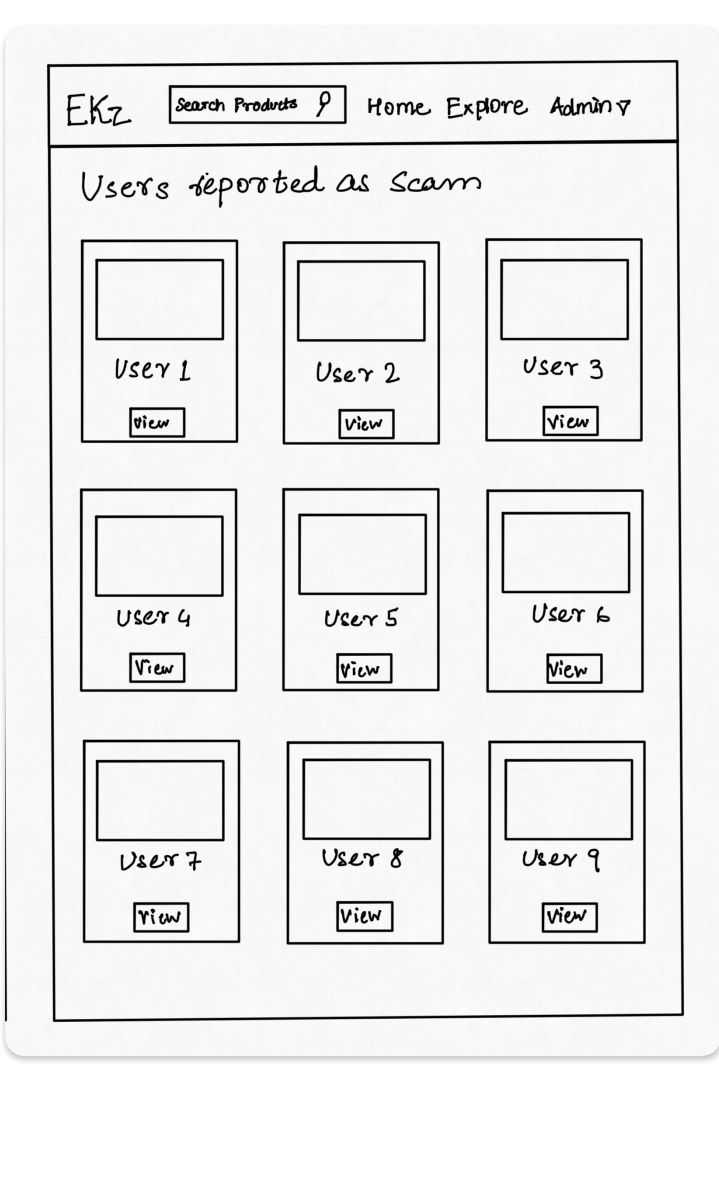
Screen 6: Post Approval Detail View

- **Scene:** An administrator clicks **"View"** on a specific post.
- **Action:**

- The **Product Detail (Approval View)** page opens, displaying comprehensive post information such as title, image, description, and more.
- The administrator reviews the content and has two options:

* **Approve Post:** This action makes the post live.
* **Reject Post:** The administrator must provide a reason in a text field (e.g., "Incomplete details" or "Inappropriate content").

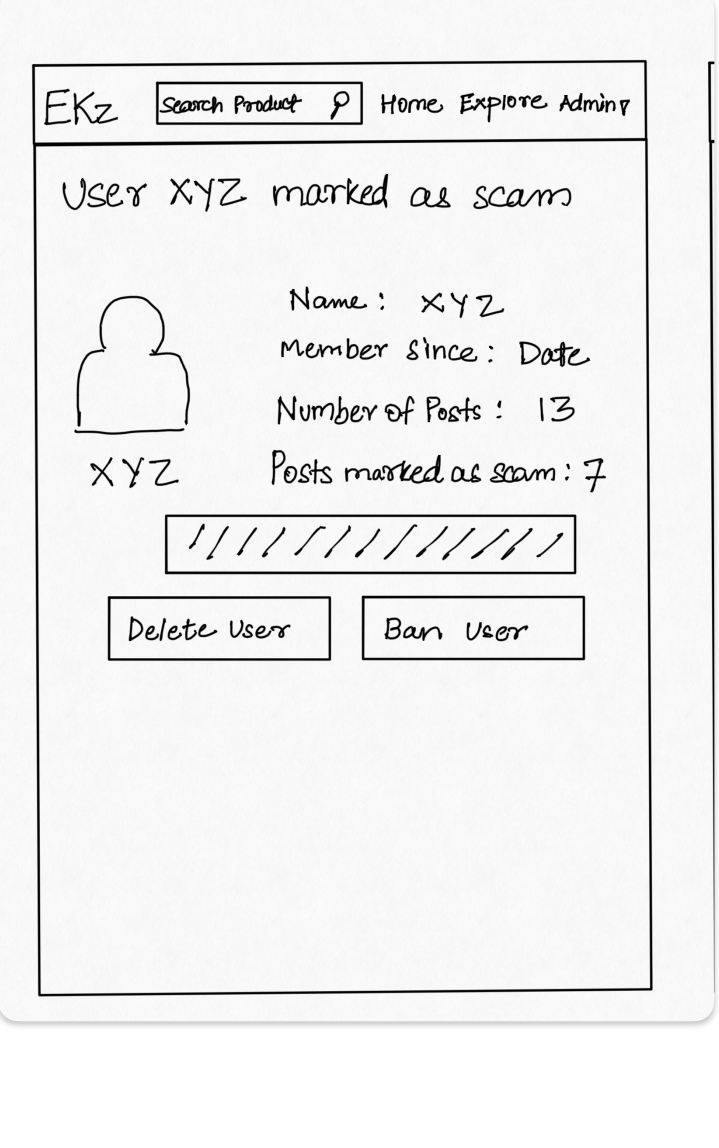
- Upon rejection, the seller has to **resubmit** the post.



Screen 7: Users Reported as Scams

- **Scene:** An administrator clicks on "**Section 2**: *Users reported as scams."*
- **Action:**
- A new screen loads with **user cards** or **tab-like modules**, each containing:

* Brief user information
* Report reason or the number of posts marked as scams
* **"View"** button to inspect further



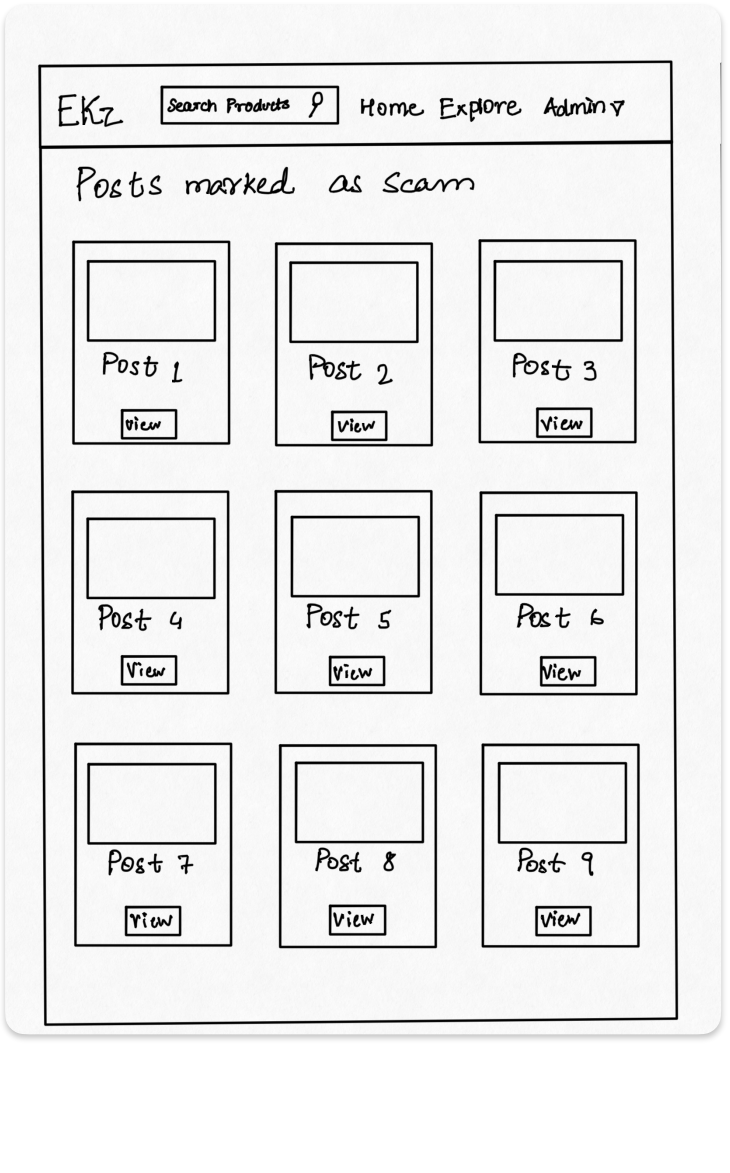
Screen 8: User Detail View (Scam Report)

- **Scene:** An administrator clicks **"View"** on a reported user.
- **Action:**
- A new screen opens, displaying detailed user information:

* **Name**
* **Member since**
* **Total posts**
* **Posts marked as scam/spam**

- The administrator is provided with two action buttons:

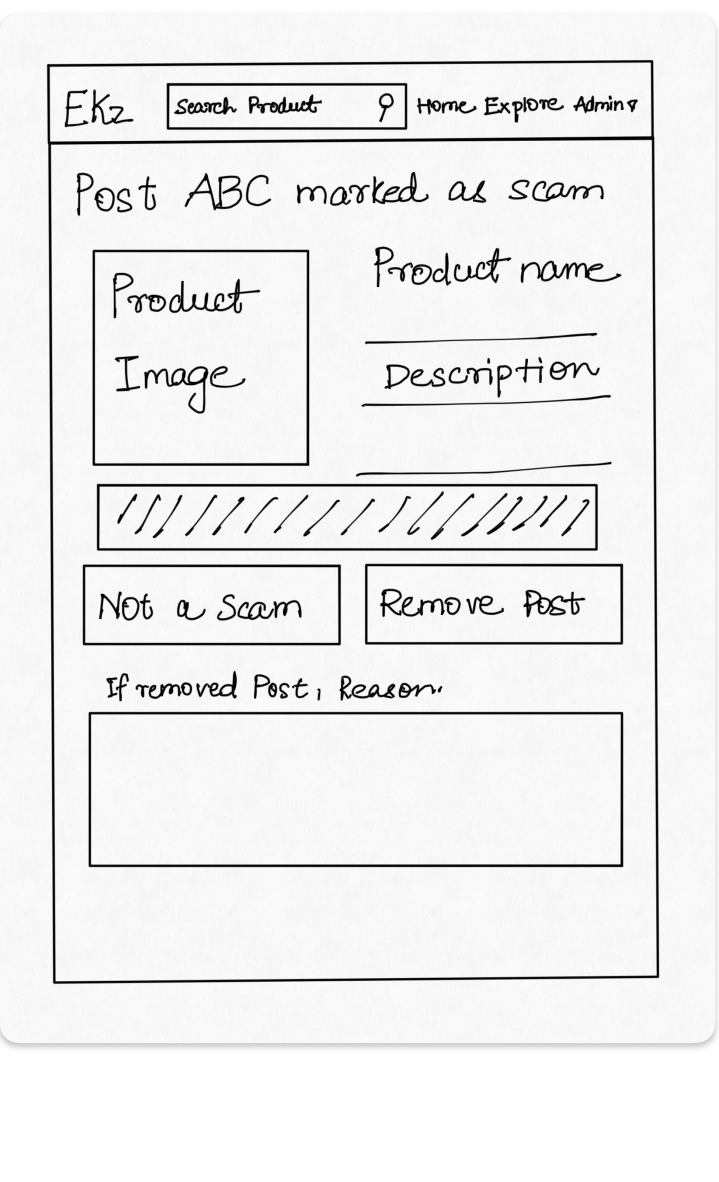
* **Ban User**: Temporarily restrict account access for a relevant time period.
* **Delete User**: Permanently remove the user from the platform.



Screen 9: Posts Marked as Scam/Spam

- **Scene: Admin Clicks on Section 3 - *Posts Marked as Scam/Spam***
- **Action:**

- A new screen opens, displaying concise information about all posts marked as scam. This information is presented in a **tabbed or card-like** format, with a **"View"** button for further access.



Screen 10: Scam Post Detail View

- **Scene:** An administrator clicks **"View"** on one of the scam-marked posts.
- **Action:**
- A detailed page opens, displaying the following information:

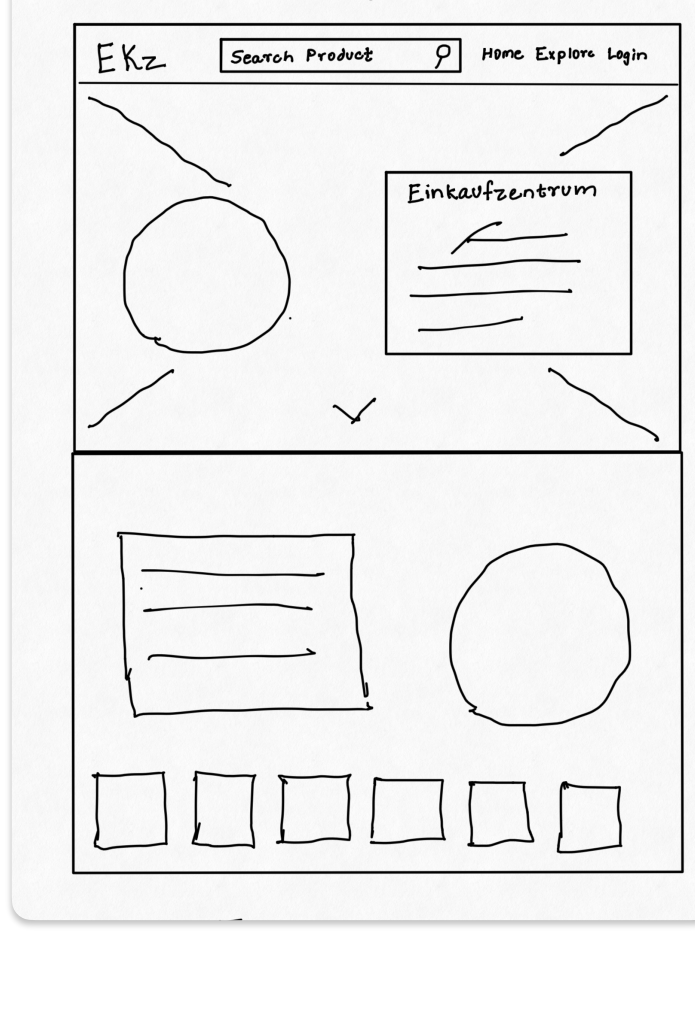
- **Product name**
- **Image**
- **Description**
- **Scam context provided by the buyer**

- The administrator reviews the post and its context and chooses one of two actions:

- **Remove Post**: This action requires a mandatory input field to **write a reason** (e.g., "Misleading content," "Duplicate listing," etc.).
- **Unmark as Scam**: This action restores the post if the report was deemed incorrect.

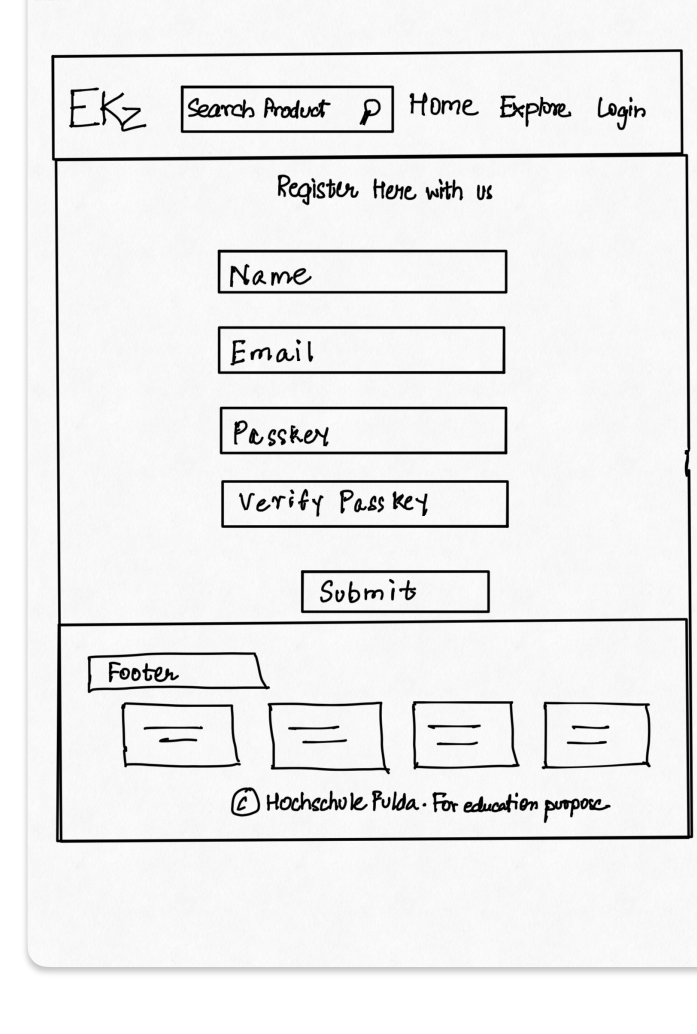
Use case 5

New user account creation.



Screen 1: Homepage

- **Scene:** Andrew Meier navigates to the homepage of the Einkaufzentrum website.
- **Action:** He clicks on the prominent **"Sign Up"** button situated at the top of the page.



Screen 2: Signup Page

- **Scene:** The signup form screen appears.
- **Action:**
- Andrew completes the following details:

* **Full Name**

* **University Email**

* **Password**

* **Verify Password**

- He then clicks the **"Submit"** button to proceed.

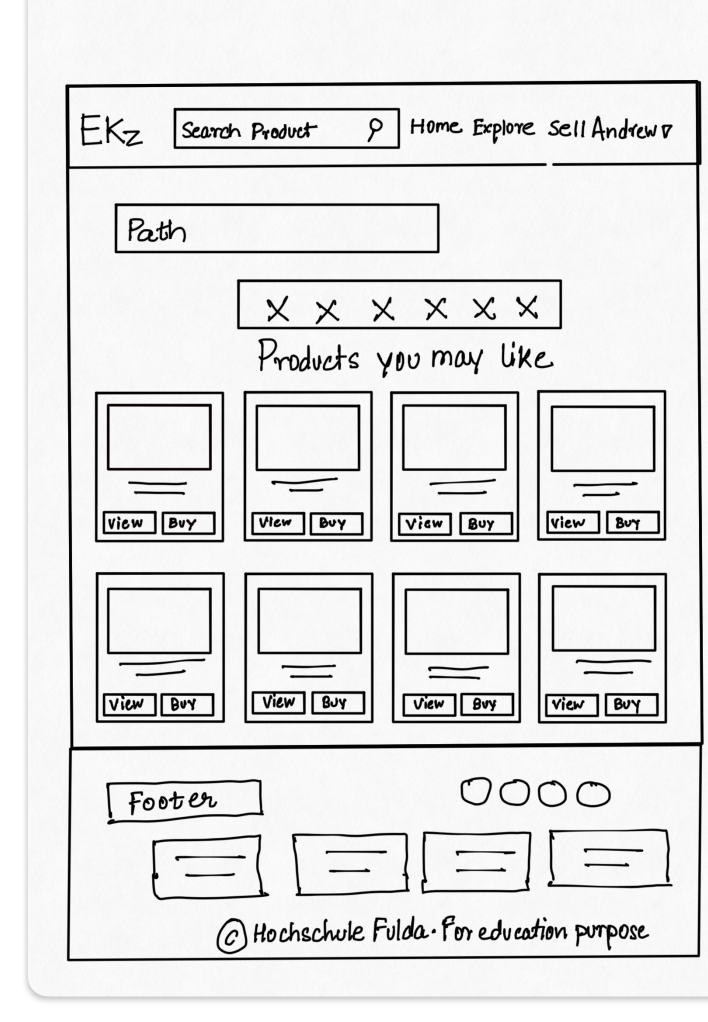
Screen 3: Email Verification Page

- **Scene:** Upon submitting the signup form, a new screen appears, prompting email verification.
- **Action:**

- Andrew is informed that a **verification code** has been sent to his university email address.
- He enters the received code into the provided input field.
- He subsequently clicks **"Submit"** to verify his email and complete the registration process.



Screen 4: Explore Page

- **Scene: Upon Successful Email Verification**
- Upon successful email verification, Andrew is redirected to the Explore page.
- **Action:** As a registered user, he can now commence browsing, posting, or engaging with listings.
